PSECU raises money for Campus Cupboard

PSECU held a fundraiser event in September to help Campus Cupboard, which is a free student food pantry that helps food-insecure Millersville students.

“It was part of an effort to give back in the process.” Trilling added on to this, saying that “it was part of an effort in the University community that was also a way to have a positive impact on students.”

This is not the only philanthropic gesture that PSECU has engaged in. In fact, they support numerous organizations on campus as a way to give back to the community. Schonhaut went in depth on: “The Credit Union philosophy is People Helping People. That’s why we build Financial Education Centers and not branches. We’re here to help students learn about finances so that when they graduate they have a better understanding of the decisions and choices that are in front of them.”

Additionally, PSECU can often be found in the background, supporting groups in various ways that the general public may not fully know about. “For instance, this past weekend during Homecoming, we were tabling at the tailgate, but PSECU had also paid for the catering in the Alumni tent, which was free for Alumni.” Trilling clarified.

This is all because of the fact that PSECU is committed to helping the community they serve. Schonhaut makes it clear that “the Credit Union philosophy is People Helping People.”

With about 6,000 undergraduate students attending Millersville, University safety is always considered a priority on campus. The Millersville University Police Department is committed to the safety of the students and faculty above all else.

The MUPD released their Annual Security and Fire Safety Report. This includes an updated list of instructions on what to do in case of various emergencies that could occur on campus such as in the event of shootings, fires, lockdowns, and missing persons. It also provides information on sexual assault and harassment, the drug and alcohol abuse among students, and the general student code of conduct, and when to report an incident. One of the most important part of the report is the crime statistics for the year.

Some of these statistics may be surprising, it is important to remember that these statistics only include reportable crimes. Many crimes may occur that go unreported for a number of potential reasons; however, if they remain unknown, they cannot be included in any annual data report.

One significant change to be aware of is the change in crime reporting. First, two new crimes have been included to the original Campus Crime Statistics Report, in order to track down the offenders, keep statistics accurately updated, and to maintain community safety. The MUPD is dedicated to serving the community and especially the students to make sure they feel safe and protected at all times on campus.

Students can also download the app, LiveSafe, to make reports and to increase communication between themselves and MUPD.

REPORTED INCIDENTS

1. Instances of rape
2. Instances of aggravated assault
3. Instance of robbery
4. Instances of burglary

REPORTED INCIDENTS INVOLVING ARREST

44 instances of broken liquor laws
42 instances of broken drug laws
2 instances of weapon possession

We may all be tired of hearing it, but we all need to vote this upcoming election. It may seem stupid to some that the outcome of the election is somehow cool with the way it’s managed, but in reality, it is ultimately hard to leave our vote to others. We all have and get gratification from the shared experience from these moments. Young people are caring and inclined to actually go out and vote, and when we see others talking about voting, we feel more encouraged to vote, and then assume that they will do it, even if we don’t vote ourselves. We all have an inalienable right to the vote. If, for some reason, we don’t vote, it is an ableism perspective to blame us all for the short end of the stick when it comes to movements. It is an ableism perspective for a movement.

The issue is not really about straw access for me. The real issue here is that people with disabilities have always been the recipients of the shortest end of the stick. It doesn’t come to moments like these. It is an ableism perspective for us to assume that banning straws will not hurt anyone. It does hurt the people who need those straws.

Abilism, for those who do not know it, is a strict view of discrimination against those who have disabilities. They can be physical, mental or a learning disability that someone can discriminate against. I am all for the environment and I will do everything I can to save our planet, but I will withdraw that support if any messages are made in support of abilism. I do not believe that we should take them away from those who do.

Some of us need straws: stop banning them

There has been a lot of buzz about the state of plastic straws and the ways to ban them. It is a win for the environmentalists, I will say that, and they need wins with the corruption and downright denial of climate change. I hear the retort, “What, are you attacking those who need straws due to a disability?”. Let me be clear about this, I personally do not need a straw, but I do not want to make any decisions on who should have access to it. Renewable straws are not an answer for those with physical disabilities where straws are required, I know exactly what the result will be. You could just buy a straw or you could bring your own, I will allow Valencia, Zuckerman warned me that, "although social media can give the illusion of empowerment, it also runs the risk of diverting attention away from the knottier problems of longer-lasting policy changes." While this idea of empowerment is associated with the particular movement in question, I do feel that this is an unanswerable one. It is an ableism perspective for a movement.

All fun and games at Millersville’s community parade

This past weekend, along with Millersville’s many other Homecoming activities, was the well-loved Millersville Community parade. The long-awaited tradition brings together the university and the surrounding town each year. The parade included the local fire company, participants from Millersville University, and local Pennsylvania companies and offices. Along with the usual participants, Millersville added some new friendly faces to the festivities: Llamas! Altogether, the parade was one of the highlights of Homecoming weekend, and should make anyone’s list to attend for next year’s Homecoming activities.

**A classic story gets new life in Bradley Cooper’s ‘A Star is Born’**

Currentely, Bradley Cooper’s “A Star is Born” further solidifies its claim as the best film of 2018. Though it retells the story behind the classic musical romance, it manages to go even further. The film is a version of the story of Lady Gaga and Bradley Cooper, and their complicated love affair with the rising star, Ally played by Lady Gaga and directing newcomer Cooper manages to go even further. The film is a version of the story of Lady Gaga and Bradley Cooper, and their complicated love affair with the rising star, Ally played by Lady Gaga and directing newcomer Cooper.

Gaga's music performance of the classic French ballad, “Shallow,” is her whole life changes as she becomes the film’s breakout star. Millersville suffers gut wrenching loss at homecoming giving them their fifth loss of the season.

JARED KISH  Sports Editor

After winning the last two weeks, Millersville looked to continue their success as they returned home to face Shippensburg. On homecoming weekend, Millersville hoped to give the crowd something to cheer about.

Shippensburg had lost four consecutive games and Millersville looked to make it five straight. Unfortunately, it would be a tough homecoming for the Marauders as they got shutout 37-0. This is the first time the Marauders have been shutout since the 2016 season.

In the first quarter Shippensburg's quarterback Brycen Mussina would find tight end Shea O’Dell for a touchdown. Shippensburg had 23 points going into the half.

Millersville’s offense did not play well in the first half as no points would be scored for the Marauders.

Coming out for the third quarter, Millersville hoped to put some points on the board and get their offense going. However, the offense still could not find their stride as the only points scored in the quarter would be by Shippensburg.

Chase Vacum would run the ball past the goal line to give Shippensburg a 30-0 lead. When the fourth quarter rolled around Millersville found themselves in a huge hole that would be almost impossible to climb out of. But down 30-0, the Marauders would need a miracle to come back.

Shippensburg would add insult to injury on another touchdown on a 10-yard run by Brian Benjamin. This touchdown would secure a shutout win for Shippensburg and give the crowd something to cheer about. The Millersville offense could not get anything going to give them a scoring drive. Only two drives would exceed five yards.

This meeting will be the first one ever between the two programs.

NOT SO SWEET HOMECOMING

At the start of the second quarter the score was still 0-0. It would remain that way for half the quarter until Shippensburg’s Luke Davis would run it in the end zone for a touchdown. Shippensburg would score two more times in the quarter, once on a field goal and the other on another touchdown. Shippensburg had 23 points going into the half.

Millersville stumbled in the second quarter, resulting in a 37-0 defeat for Millersville.

Millersville’s punter Tyler Reinman would be leery as he punted the ball 10 times in the air over the day as Shippensburg had a total of 493 yards on the day giving them 239 more yards than Millersville.

The Shippensburg run game would have 208 yards giving them the highest total of yards on the season.

Despite getting five turnovers on two interceptions and three fumble recoveries, Millersville’s defense could not stop the Shippensburg offense.

The Marauders look to bounce back next weekend from this tough loss as they will take on Malone University.

This meeting will be the first one ever between the two programs.

Soccer splits with Slippery Rock

KAT VASQUEZ  Associate Sports Editor

It was a triumphant win for men’s soccer and a bittersweet loss for women’s soccer at Pucillo Field which both teams were battling against Slippery Rock University this homecoming weekend. Overall both teams played tremendously and brought together a whole community of alumni, families, and students to cheer, celebrate and praise on both teams.

It was a bittersweet defeat for the Millersville women’s soccer on Friday afternoon when Slippery Rock powered through and dominated the field leading to their win 2-1. This unfortunately leaded Millersville to their third loss in conference play.

Towards the last minute of the match, Kayla Ledl of Millersville had an opportunity to score off the post and the off the crossbar. Unfortunately, Ledl was not able to convert them into goals and time ran out, leaving Slippery Rock to win.

The Millersville offense could not get anything going to give them a scoring drive. Only two drives would exceed five yards.

The Millersville defense did not play well enough to achieve the result we had today. It was a very competitive play, but we were able to win. However, we did a lot of great things. I’m happy with how we didn’t give up and continued to fight until the end of the match.”

The Marauders take on Clarion University at 1:00 pm at Pucillo Field Saturday, October 20th.

Volleyball bumps up their record

JARED KISH  Sports Editor

The Marauders took the road this weekend to face Kutztown and East Stroudsburg on Saturday and Sunday. The Marauders faced Kutztown on Saturday morning and East Stroudsburg on Sunday afternoon.

The first set of the match was tightly contested but Millersville came out on top 25-23. Millersville found themselves down 19-15 in the set but battled back to eventually win the set 25-16.

The second set was one of the most competitive set of the match. Millersville only had three errors and nine combined errors for Kutztown. It was a solid performance by the Marauders.

Like the first set, Millersville would sweep East Stroudsburg. In the first game, Millersville had to fight hard to beat East Stroudsburg. The Marauders eventually in the 25th minute, scored a goal.

Coming out for the third set, Millersville would battle hard to get the sweep. It was a set winning effort for the Millersville offense.

Millersville’s offense did not play well in the first half as no points would be scored for the Marauders.

Coming out for the third quarter, Millersville hoped to put some points on the board and get their offense going. However, the offense still could not find their stride as the only points scored in the quarter would be by Shippensburg.

Chase Vacum would run the ball past the goal line to give Shippensburg a 30-0 lead. When the fourth quarter rolled around Millersville found themselves in a huge hole that would be almost impossible to climb out of. But down 30-0, the Marauders would need a miracle to come back.

Shippensburg would add insult to injury on another touchdown on a 10-yard run by Brian Benjamin.
